

FISHERY By-Product SURVEILLANCE REPORT

IFFO GLOBAL STANDARD FOR RESPONSIBLE SUPPLY OF FISHMEAL AND FISH OIL

FISHERY By-Product:	Lemon sole (<i>Microstomus kitt</i>)
LOCATION:	UK & Ireland-Ices Area IVa-c, VI a, VIIa,b,d-h,j2
DATE OF REPORT:	19/02/2012
ASSESSOR:	Sam Peacock

Global Trust Certification Ltd, Quayside Business Centre, Dundalk, Co. Louth, Ireland Tel: 042 932 0912 Fax 042 938 6864			
Form No: 9	Report Ref: UK	Page 1 of 5	CCM Code:

1. APPLICATION DETAILS AND SUMMARY OF THE ASSESSMENT OUTCOME		
Name:		
Address:		
Country:	Zip:	
Tel. No.	Fax. No.	
Email address:	Applicant Code	
Key Contact:	Title:	
Certification Body Details		
Name of Certification Body:	Global Trust Certification Ltd.	
Assessor Name	Peer Reviewer	Initial/Surveillance/ Re-certification
Sam Peacock	Mike platt	Surveillance
1. Scope of Assessment	By-Product surveillance	
2. Fishery By-Product	Lemon sole (<i>Microstomus kitt</i>)	
3. Fishery By-Product Location	UK & Ireland-Ices Area IVa-c, VI a, VIIa,b,d-h,j2 (R6)	
4. Fishery Method	Beam trawl, otter trawl, gillnet	
5. Outcome of Assessment	Maintain approval	

2. GUIDANCE FOR ONSITE ASSESSMENT

3. ASSESSMENT DETERMINATION

There is a robust fishery management framework at the EU and UK & Ireland levels, although this is not extensively applied specifically to lemon sole in the assessment area. Management is supported by limited species-specific data collection and stock assessment. The assessment team recommends the approval of this byproduct be maintained.

4. RATIONALE OF THE ASSESSMENT OUTCOME

A. THE MANAGEMENT FRAMEWORK AND PROCEDURE

LEVEL OF COMPLIANCE	
<i>The management of the fishery used to produce the By- Product must include a legal and administrative basis for the implementation of measures and controls to support the management of the fishery.</i>	
LOW	There is no satisfactory legal and management framework for fisheries in the region.
MEDIUM	An administrative and legal framework that underpins management of fisheries in the region is established, but it is not directly applied to the byproduct stock under assessment.
HIGH	A legal and administrative framework that ensures an efficient management for fisheries in the region is established and applied specifically to the byproduct stock under assessment.

Determination: *There are effective fishery management frameworks in place at the EU and national levels, but species-specific management measures are limited. As there is no management plan or species-specific TAC, the assessment team considers a medium compliance rating to be appropriate.*

M

Fishery management framework:

The UK & Ireland are members of the European Union and therefore in Community waters implement the Common Fisheries Policy (CFP). In force since 1983, the CFP aims to reconcile resource conservation with the preservation of income and jobs in coastal zones that offer few alternatives in terms of production or employment. It therefore covers not just resources but also markets and structures.

With regard to resource management, the CFP regulations comprise:

- A traditional management tool based on TACs and quotas;
- Technical measures relating to gear or catch;
- Effort-related management, based on vessel engine power and the number of days at sea.

The CFP also provides for the introduction of measures to rebuild, over a period of several years, stocks that are threatened in terms of sustainable harvesting, and for recourse to effort-related management rules to supplement TACs and quotas. An extensive reform of the CFP is currently under discussion by the European parliament and council, with the aim being to finalise negotiations by the end of 2013.

The primary authorities with responsibility for implementing the CFP are the Department of Agriculture, Food and the Marine in Ireland, the Marine Management Organisation (in cooperation with the Department for Environment, Food and Rural Affairs) in the UK.

Species-specific management:

Although there is no species-specific management plan for lemon sole, it is subject to a combined TAC along with witch in Division IIa and Subarea IV. Lemon sole are generally caught in mixed fisheries by beam trawlers and otter trawlers, and are not subject to a minimum landing size.

B. STOCK ASSESSMENT PROCEDURES AND MANAGEMENT ADVICE		
LEVEL OF COMPLIANCE		
<i>B. Research in support of fisheries management should exist.</i>		
LOW	Research to support the management of regional fisheries does not exist.	
MEDIUM	Research to support the management of regional fisheries exists; however research programmes are not specifically directed at the byproduct stock under assessment.	
HIGH	Research specifically targeting the byproduct stock under assessment is carried out in support of sustainable fisheries management.	
<p>Determination: <i>Research is carried out in support of the sustainable management of EU stocks, but is severely deficient in the case of the species under assessment. ICES provides biennial advice based primarily on the precautionary approach. The assessment team considers a medium compliance rating to be appropriate.</i></p> <p>Lemon sole is subject to biennial ICES advice, the first year of which was provided in 2011. ICES considers there to be insufficient data to allow a reliable assessment. There is no information about the biological definition of the stock, and limited fishery dependent and independent data.</p> <p>R4 & R5</p>		M
C. STOCK STATUS		
LEVEL OF COMPLIANCE		
<i>C. The fish used to produce the fish By- Product is not considered to be critically at risk of over exploitation in accordance with the IUCN guidance.</i>		
LOW	The fish By-Product must not come from a species that is listed as extinct, or critically endangered by the IUCN.	
MEDIUM	The fish By- Product is from a species that is classified as vulnerable, but has a management regime in place that will control the level of fishing permitted. Alternatively if a species is listed as 'not assessed' or 'data deficient' by the IUCN and no additional information is available.	
HIGH	The fish By- Product comes from a fishery that is not deemed to be at risk of over exploitation from fishing activities. Alternatively if a species is listed as 'not assessed' or 'data deficient' by the IUCN but other sources of evidence (e.g. MSC certification) demonstrate that the species is not critically at risk.	
<p>Determination: <i>Lemon sole has not been assessed by the IUCN redlist and no additional information on vulnerability is available.</i></p> <p>The IUCN has not assessed <i>Microstomus kitt</i>.</p> <p>R7</p>		M
