Table 1 Application details and summary of the assessment outcome

	Species:	Cod (Gadus morhua)
	Geographical area:	Kattegat
Fishery Under Assessment	Country of origin of the product:	Denmark
	Stock:	Cod in ICES Subdivision 21
Date		April 2024
Report Code		DNK38
Assessor		Sam Peacock
Country of origin of the product - PASS		Denmark
Country of origin of the product - FAIL		N/A

Application details and	summary of the asses	sment outcome	
Company Name(s): Thy	yborøn		
Country: Denmark			
Email address:		Applicant Code:	
Certification Body Deta	ails		
Name of Certi	fication Body:	NSF / Globa	al Trust Certification Ltd.
Assessor	Peer Reviewer	Assessment Days	Initial/Surveillance/Re-approval
Sam Peacock	Léa Lebechnech	0.2	Surveillance 2
Assessment Period		April 2024 – Apr	il 2025

Scope Details	
Main Species	Cod (Gadus morhua)
Stock	Cod in ICES Subdivision 21
Fishery Location	Kattegat
Management Authority	Donmark / FII
(Country/ State)	Denmark / EU
Gear Type(s)	Active and passive gears
Outcome of Assessment	
Peer Review Evaluation	Agree with the assessor's determination
Recommendation	APPROVED

Table 2. Assessment Determination

Assessment Determination

If any species is categorised as Endangered or Critically Endangered on IUCN's Red List, or if it appears in the CITES appendices, it cannot be approved for use as Marin trust raw material. Cod (*Gadus morhua*) does not appear as Endangered or Critically Endangered on IUCN's Red List, and does not appear in CITES appendices; therefore, *Gadus morhua* is eligible for approval for use as Marin trust by-product raw material.

Cod in ICES Subdivision 3.a.21 is subject to annual stock assessment by the ICES Baltic Fisheries Assessment Working Group (WGBFAS). Although a TAC is set for the stock, there are no established reference points, and ICES states that it "cannot assess the stock and exploitation status relative to MSY and precautionary approach". For this reason, the stock has been assessed under Category D.

Cod was awarded a Productivity score of 1.71 and a Susceptibility score of 2.5, leading to a Pass rating in Table D3. Therefore, cod (*Gadus morhua*) in ICES Subdivision 3.a.21 is **APPROVED** for the production of fishmeal and fish oil under the current MarinTrust v2.3 by-products.

Fishery Assessment Peer Review Comments

The assessor correctly classified cod (*Gadus morhua*) in FAO 27 – ICES subdivision 3.a.21 (Kattegat) under Category D, the stock being subject to a set TAC, but not established reference points.

It passed the PSA risk-rating with a productivity score of 1.71 and susceptibility score of 2.5.

In conclusion, cod (*Gadus morhua*) in FAO 27 – ICES subdivision 3.a.21 (Kattegat) passes category D and therefore should be approved under the MarinTrust Standard v2.3.

Species Categorisation

NB: If any species is categorised as Endangered or Critically Endangered on the IUCN Red List, or if it appears in CITES Appendix 1, it **cannot** be approved for use as an MarinTrust raw material.

IUCN Red list Category

By-product material from a species listed by IUCN (the International Union for Conservation of Nature) under the Red List for the following categories shall immediately fail the assessment;

- EXTINCT (E) AND EXTINCT IN THE WILD (EW)
- CRITICALLY ENDANGERED (CR) facing an extremely high risk of extinction in the wild.
- ENDANGERED (EN) facing a very high risk of extinction in the wild.

By-product material may be used from the following categories provided that all clauses in the MarinTrust standard are passed.

- VULNERABLE (VU) facing a high risk of extinction in the wild.
- NEAR THREATENED (NT) does not qualify for above now, but is close or is likely to qualify for, a threatened category in the near future.
- LEAST CONCERN (LC) Widespread and abundant.
- DATA DEFICIENT (DD) and NOT EVALUATED (NE)

Table 3 Species Categorisation Table

Common name	Latin name	Stock	Management	Category	IUCN Red List Category ²	CITES Appendix 1 ³
Cod	Gadus morhua	Cod in ICES Subdivision 21	No	D	Least Concern ⁴	No

⁴ https://www.iucnredlist.org/species/8784/45097319

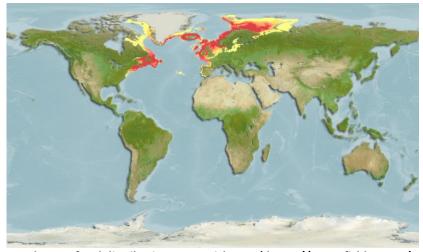

CATEGORY D SPECIES

Category D species are those which are not subject to a species-specific management regime. In the case of mixed trawl fisheries, Category D species may make up the majority of landings. The comparative lack of scientific information on the status of the population of the species means that a risk-assessment style approach must be taken.

Species Name	Cod (<i>Gadu</i>	ıs morhua)
Productivity Attribut	e Valu	ie Score
Average age at maturity (years)	3.6 ye	ears 1
Average maximum age (years)	16.9 ye	ears 2
